

Document Wizard®

USS975 Document Wizard-Document Imaging Systems Division

United Systems and Software, Inc. (USSI), is proud to announce the availability of Document Wizard, Version 7.0, a major release upgrade to the Document Wizard family of imaging products. Document Wizard provides the user with a full-function document image storage, indexing, retrieval and management system.

Document Wizard provides a full-function document image solution, including:

- Document scanning control, enhancement and image storage
- Document image indexing
- Document image retrieval
- Document image printing, zoom, text notes, and much more...

Best of all, Document Wizard is inexpensive, easy to install and very easy to operate.

SpArkive™

USS997 Spool File Archive-Document Imaging Systems Division

United Systems and Software, Inc. (USSI), is proud to announce the availability of SpArkive, Version 7.0, a major release upgrade to the Document Wizard family of imaging products. SpArkive was designed as a traditional COLD (Computer Output to Laserdisc) system, providing a low cost, effective system for storage of computer generated reports and forms.

SpArkive eliminates the need to print reports and store volumes of paper by providing a method to store reports on tape or optical disk, then retrieve and view those reports as needed.

Here are some of the many features that SpArkive possesses:

- Eliminates the need to print and distribute report copies
- Eliminates the need to store volumes of paper reports
- Provides quick and easy access to any archived report
- Provides a means to search a report for specific data, thereby reducing research time
- Dramatic reduction in the time required to find the information you need
- Great potential for cost savings of storage, retrieval time, administration costs and reproduction/copies cost
- Elimination of microfilm and microfiche
- Permanent archiving and immediate access to all reports
