

Workers Compensation

USS915e Workers Compensation Administration System

The United Systems and Software, Inc. (USSI), Worker's Compensation Insurance Administration System (USS915e), is a series of integrated systems designed to meet the administrative requirements found in most worker's compensation providers, including self-insured funds, third party administrators (TPA's), and self-insured companies who choose to administer their own worker's compensation programs.

USS915e offers on-line, real-time processing and includes the basic functions required by today's worker's compensation provider; with features to help better serve employer participants and their injured employees, and aid internal operations.

The USS915e family of integrated systems include:

- Claims Administration and Processing
- Fee Schedule Adjudication
- Billing and Accounts Receivable
- Audits
- Commissions
- Experience Modification
- Extensive Financial and Loss Reporting
- Internet enabled inquiries
- Email
- Document Imaging and Internet Support

USS915e uses a relational database, providing great flexibility when addressing new requirements and responding to management requests for information.

Product Description

USSI's Worker's Compensation Administration System is designed to support TPA's who are administering self-insurance funds or self-insured companies who may be administering their own worker's compensation program.

The system is entirely menu driven, and is extremely user friendly, with on-line help-text for all operations. Control codes, descriptions, and rates are all user defined. Support for all traditional administrative functions is provided.
